Art Unit: 2852

1. Claims 11-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 11 and 13, the use of "or" renders the claim indefinite.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 11-13,20-21,26-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Umeda (JP# 06-67141).

Umeda teach an image forming apparatus (see Fig.4) comprising a photoconductor 2, a latent image forming device 4, a developing device 28, a transfer roller 7 connected to a bias supply 30, and a fixing device 31. The apparatus also has a first supply tray 25 having a first recording medium 27, and a second supply tray 26 having a re-writable recording medium 1. In operation, if a first supply tray is chosen, the latent image information on the photoconductor will be developed with toner and transferred to the recording medium 27; if a second supply tray is chosen, the developing device will be retracted (image forming element) and the transfer roller (image forming element) grounded such that an

image is displayed on this second recording medium via the charged latent image information on the photoconductor.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-10, 14-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Umeda (JP 06-67141) in view of Ito.

Umeda taught supra discloses most of what is claimed except the element for switching between the normal image forming medium mode and the reversible image forming medium mode being a switch on the sheet feeder. Ito teach an image forming apparatus wherein a plurality of sheet feeders 20,21 are provided having switches 401-404 and 410-417 for detecting the type of sheet in each feeder. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use switches associated with the feeders themselves for determining what type of sheet is in what cassette because manual manipulation/designation can be eliminated which is desirable.

4. Claims 22-25 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Baba et al., Albert, Wen et al.'680, Wen et al. '410, Miyasaka et al., and Vincent teach various re-writable recording mediums and apparatus for using them.
